Dear Dean,

Once again thank you for letting us use and work with you on the thrusters.

As VP and Director of training for the IAHD I am in awe of this product and its ability to assist in the freedom and mobility for people with disabilities.

This truly is the first product that all disabilities can use in Scuba Diving and is the first product that I am willing to endorse publicly and as an organization we are willing to promote this product to all agencies that work in these fields.

On a personal note working with you and your listening to suggestions that were made and the fact that you have been so open in the way that you wish the product (The Thruster) to assist not only able bodied people but people with disabilities as well is an outstanding thing as a lot of people just do not care what people with disabilities do.

This is a piece of equipment that all Dive Centres working with people who have disabilities should have no questions asked, as it is the only one in the market which does not need to be held on to and can be operated by your chin, these are first in the world and a first in diving to break down some of the barriers put up by other manufacturers.

I look forward to working with you and all the new versions of the Thruster this product has my seal of approval world wide and I am honoured to be invo

Yours truly,

FRASER BATHGATE

Mr. FRASER BATHGATE, VP

International Disability Sports

Board of Recommendation:
Mr. Eric Terpstra
Mr. Pieter van Vollenhoven
Mr. Dick Rubkowski
